- PM034 – PMI-SP® Exam Preparation Workshop
 - 3 Days
 - Pre-reading required: PMBOK® Version 4

Course Description

To meet the growing demand for project managers experienced with scheduling and to offer a credential for those who specialize in scheduling, the Project Management Institute (PMI) has developed a credential for scheduling professionals who work on project teams. The new credential is the PMI Scheduling Professional (PMI-SP) credential.

Learn a valuable skill and differentiate yourself from other Project Managers!

Learn best practices for scheduling and also prepare for the PMI Scheduling Professional (PMI-SP) certification exam through this four day, instructor led course. This course offers an in-depth look at project scheduling through a PMI perspective, and is delivered in a combination of lecture, group exercises, and sample exams. In this intensive course, you will receive a comprehensive review of project scheduling, covering the following domains:

- Schedule Mission Management
- Schedule Creation
- Schedule Maintenance
- Schedule Analysis
- Schedule Communications and Reporting

You will learn:

- * Selecting the right scheduling method
- * Understanding the scheduling model
- * Understanding the various scheduling tools
- * Developing the list of schedule activities
- * Generating the schedule network diagrams
- * Estimating resources and durations
- * Understanding critical chain method
- * Developing and controlling the schedule
- * Understanding scheduling risks
- * Communicating the schedule

NOTE: This course does not include training in the use of Microsoft Project or any software for project scheduling.
