Public Enrollment Workshops Calendar

Corporate Education

ALL workshops listed above can be delivered as instructor-led workshops on-site at your organization for maximum value.

Microsoft Project® Bootcamp

Do you need a tool to help you organize your project plans? Has the thought of learning Microsoft Project® kept you awake at night? Become comfortable with this powerful tool to enhance your ability to communicate the status of your projects to your stakeholders. This interactive course allows you the opportunity to set-up, develop and execute a project plan through hands-on exercises.

Fundamentals of Project Management

Are you outfitted with the necessary tools when faced with project challenges? Build your own personal tool belt with tips and techniques based on best practices recognized internationally. This dynamic and practical course will allow you to put to immediate use your newfound skills and knowledge to achieve project success.

PMP®/CAPM® Exam Preparation

***PMP® - Wanted: Project Management Professional.** How often are you seeing this as a demand in the workplace? Join the elite group of practitioners by earning your PMP® Credential and be recognized for your professional experience. Increase your chances of success by taking the Bay3000 preparation course to prepare for your exam. Benefits of the PMP® Credential include: Potential of increased earnings and career advancement, recognition of your knowledge and your skills and abilities.*

***CAPM® - Are you interested in a career in Project Management?** Take the initiative to earn your CAPM® Credential and demonstrate your commitment to the profession. Take the Bay3000 course to increase your chances of success at passing your exam. Benefits of the CAPM® Credential include: Preparing you for greater job responsibilities, building self-confidence by increasing your proficiency, and demonstrating your willingness to invest in Professional Development*

Program Management Trends

Do you want to raise your professional knowledge to a new level beyond the PMP®? In this intensive workshop, you will learn where the discipline of program management is going and you will learn valuable practical knowledge for initiating, planning and managing effective programs. This workshop uses consistent framework with the PMI Program Management Standard.

Risk Management Trends

Research shows that most project management methodologies do not pay sufficient attention to effective project risk management practices. Join us in this intensive workshop and learn the practical application of the PMI Standard for Risk Management. You will have the opportunity to practice and transform theory into specific practical techniques to take back to your organization.

Program Management - PgMP® Exam Preparation

Attention all Program Managers and those who want to learn program management! This course teaches you a best practices framework for program management and it also covers the PgMP® Credential exam knowledge that will set you apart from your peers as someone who has demonstrated excellence in managing the alignment of program scope with strategic business objectives. This is an excellent course even if you do not intend to write the credential exam.

PMI-RMP® Exam Preparation Course – Risk Management Professional

To meet the growing demand for project managers experienced with risk management and to offer a credential for those who focus on risk management, the Project Management Institute (PMI) has developed a credential for risk professionals who work on project teams. The new credential is the PMI Risk Management Professional (PMI-RMP) credential. Learn best practices for scheduling and also prepare for the PMI Risk Management exam through course.

PMI-SP® Exam Preparation Course – Scheduling Professional

To meet the growing demand for project managers experienced with scheduling and to offer a credential for those who specialize in scheduling, the Project Management Institute (PMI) has developed a credential for scheduling professionals who work on project teams. The new credential is the PMI Scheduling Professional (PMI-SP) credential. Learn best practices for scheduling and also prepare for the PMI Scheduling Professional (PMI-SP) certification exam through course.

Masters Certificate in Project Management

E-learning – enrol for a period of 3 months to complete the required courses online

Do you want to be among those who are recognized as experts in the field of Project Management? Earn the University of Ontario Institute of Technology Masters Certificate in Project Management with this unique and comprehensive partnership with Bay3000. Develop an in-depth understanding of strategic, operational and interpersonal skills required in today's competitive business environments.

Process Mapping Essentials

Did you know that 50% of defects in products actually trace back to gaps in the business analysis process? Do you want to close the gap? Learn how to save money, reduce frustration and improve your chances of success in this hands-on session focused on business process mapping techniques.

Business Analysis Body of Knowledge and CBAP® Exam Preparation

Do you want a credential that distinguishes you from your peers as an Expert in Business Analysis? Benefits of earning your CBAP® certification include: a proven level of competence in the principles and practices of business analysis, recognition of professional competence by professional peers and management, and advanced career potential due to recognition as a Business Analysis practitioner

Essential Requirements Gathering

This workshop teaches participants to gather, analyze, and present business requirements. Participants will learn how to develop and communicate a vision document that captures the business requirements and solution goals. You will learn methods to gather and manage requirements including interviews, workshops, and questionnaires.

Facilitation and Critical Thinking

Are you tired of using the same old facilitation techniques? Are you and your teams struggling with brainstorming and making decisions? Learn new and creative processes to ignite your working sessions in order to create more robust solutions. By practicing your new skills in this interactive course, you will learn how to achieve a shared vision to support your strategic goals.

Accelerated Leadership Certificate

Do you have what it takes to lead a high performer? Leaders need to be confident, courageous and capable in order to develop and retain top employees. Learn tips and techniques on communication, leadership, influence, dealing with difficult people, facilitation and critical thinking techniques in this fast-paced highly interactive 3 Day Leadership Program.

ITIL® Foundation Certificate (V3 Prep)

Do you want to earn one of the most up and coming certifications in today's fast-paced, ever-changing IT world? Take the Bay3000 course and write your exam at a Prometric Testing Centre with one of our vouchers. Benefits of earning your ITIL® certification include: Earning an industry imperative credential which may lead to increased potential earnings, using methods to improve availability, reliability and security of mission critical IT services, showcasing your skills and increasing your value to your organization
